

TIMELINE FINAL PROJECT DATABASE & PEMROGRAMAN WEB
SEMESTER GENAP 2020/2021

Week	Due Date	Database	Web Programming
7	4/04/2021	Conceptual Design Output: ERD using Chen's Notation	Develop project template UI Output: Front end page
8	11/04/2021	<ul style="list-style-type: none"> - Logical Design (mapping ERD to Relational Model) - Validation using Normalization Output: Database relation using Crow's Foot Notation	Create project class based on database relation Output: class files
9	18/04/2021	Physical Design database Output: SQL DDL and constraint	Develop Form UI & UX Output: form UI & UX
10	25/04/2021	Assessment 2 – Theory Present database design	Assessment 2 - Theory Present web progress
11	2/05/2021	SQL DML Simple Query Output: DML query for master table	CRUD master table Output: updated class with CRUD method, implemented in master form
12	09/05/2021	SQL DML Multitable query Output: DML query for transaction table	CRUD transaction table Output: updated class with CRUD method, implemented in transaction form
13	16/05/2021	Database Programming (Trigger, Function, SP)	Authentication and Authorization Output: Register, login, logout page
14	23/05/2021	Loading master data	Develop other features: send mail, uploads, reporting, etc
15			
16		Final Project Presentation and Report
